

Discovering The Supreme Mother Goddess.

Session nr 20 of 20 December 2019- English translation – Original Dutch.

Place : Mezzaverde in Belize

Received by Wivine and Winston.

Paintings from Winston.

Preface by Wivine:

I was asked during a meditation to organize meditations with Winston to come closer to the **Supreme Being: - The Universal Mother Goddess - The Oversoul of all universes**, created by the Trinity long before the creation of the universes. I was told nothing more.

Why Winston? Because he speaks my language, he has my age, he has time and enthusiasm to do so. Because he learned to understand the Supreme, because he has been writing and drawing for a long time in an inspired way. Because it is easier with two than with many who speak different languages. This way, communication by email went fast to achieve something in a short time. Because he is a man and I am a woman : Symbol of the two polarities that interact throughout all creation.

We did these meditations together once a week for 5 weeks. We immediately shared our experiences. At the beginning the need was felt to represent our Great Goddess, to make Her known to the world. Depending on whether his drawing came to life, questions arose and more information came to us.

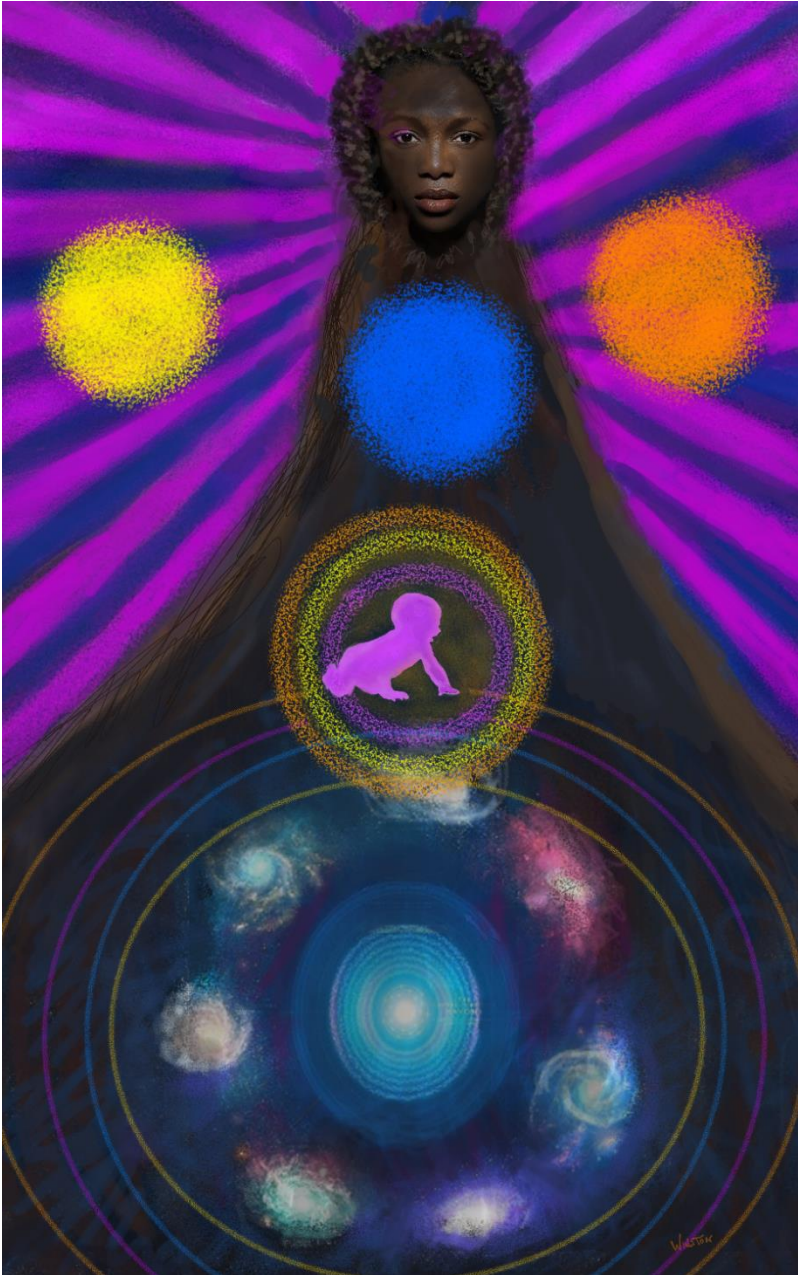

The following is a report of it with Winston's drawings to illustrate and make Her clearer; which was the primary intention.

Report of these 5 meditations.

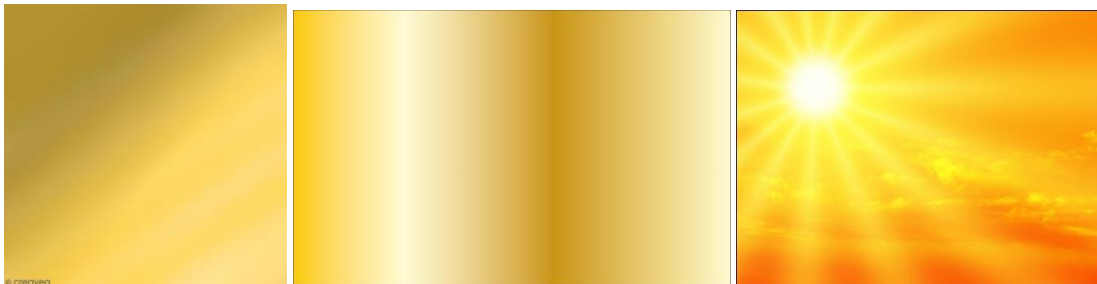

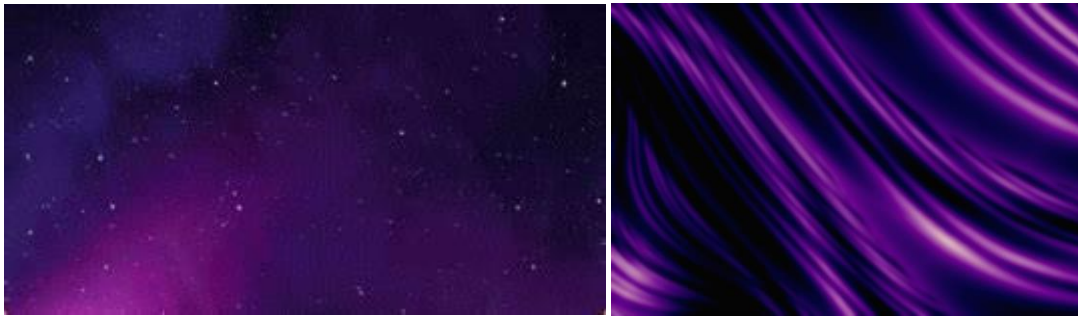

Wivine : I was able to see Her years ago. After trying and meditating a lot, Winston managed to portray the Supreme Being as I had seen Her and how he felt and perceived Her. I already described this experience in

an earlier session. But I will repeat it briefly. She has the shape of a "tagine" in the great "dark space". She is black inside, there is no light. However it feels pleasant. All along, well below Her is all the creation, with the Isle of Paradise, around which the worlds of Havona circulate, around which the seven Superuniverses circulate and around the seven Universes the 4 outer space levels with their worlds in creation. So all of Creation is in Her. We live in Her and thanks to Her.

Here is Her picture:

The image also includes the colors blue/purple/violet and yellow/gold/orange.

He involved them because most of us have been seeing these colors in variants for months during our meditations and so did he.

The question we asked ourselves then concerned the origin of these colors. Did they belong to the [Thought Adjuster](#) or God Fragment or to the [Supreme Goddess](#)?

To find out, I asked where they came from during a solitary meditation.

The explanation I received, and I asked to repeat it, was simple for now.

These colors belong to us. We radiate them through our soul. These are not the colors of the Thought Adjuster, nor of the Supreme Being.

We radiate variants of the color blue/purple/violet. It is a characteristic of the soul that indicates that we are [Sons and Daughters of the Universal Father](#), future Creatures of Paradise. Souls who have the potential to reach Paradise because they are ready to [fuse with their God Fragment](#) or on the right track.

The variations of the colors gold/yellow/orange are characteristic for souls who became [children of the Supreme Being](#). Because we are aware of Her,

that we know Her and that She knows us. As we work here to implant Her Presence and in so doing we will receive "status" in the next era of **God the Supreme**. These are the colors of the energy and communication circuits that She radiates towards the universes.

A **morontia personality** who sees the radiance of our soul will recognize these colors. See the following drawing :

radiance of our soul.

These are certainly not the colors of God, nor of the Supreme Goddess. They have no color. And if you want to give them a color, it's black. Black includes all. The Supreme Being is therefore also black. This is why we sometimes speak of "the dark space".

It is to create the Master Universe that "white light" emerged from the "black space". White light which can then split into colors for creation.

Our God Fragment can only be seen as a sphere of white light. He has no color, because He is pure energy and pure spirit, He has no human or other features.

The face of the Supreme Being is drawn because SHE has **Personality**. She is someone and can be known and recognized by all; although in reality She is a Goddess without a face, without a human shape.

The following is the story of our joint meditations. None of us saw or received much in the beginning. It came through gradually.

Meditation of December, 10th 2019.

Wivine : At the beginning, I was way up in the Goddess. I looked down and all that clear blue and white light from the **Master Universe** came up to me from the bottom.

Then I was gone. When my thoughts returned, I realized that there was no communication link between us: between the people on earth and the Supreme Being.

She can feel us, hear us, but She can't speak to us. Not even now. She is trying to show things, or pushing you to perceive or hear something, but she cannot talk like two people having a conversation.

Then I was gone again. When my thoughts returned, I was shown a picture of what was going on inside Her in relation to this communication. I will try to explain.

I was in Her, but at a lateral distance such that I could see Her from above to the bottom where the Master Universe is. Keep in mind that I always stay in Her. Never outside Her, nor face to face.

I saw the 7 Superuniverses spinning around the Isle of Paradise and the worlds of Havona.

I saw many golden lines of light leaving from the top of the Supreme to each Superuniverse. What did that mean?

Winston : A beam of golden light rays from the summit of the Supreme Being to each Superuniverse. All these Superuniverses and all outer spaces levels are stored in the Goddess, which includes EVERYTHING.

The explanation followed:

Each Superuniverse is divided into 100,000 local universes or Divine Realms. Each local universe has a "Boss". This "Boss" is always a Paradise Son of the Order of Michael - and they are Creator Sons.

It is only after a "Boss", ours is called Christ Michael, made his last and 7th bestowal on a planet of his choice in his own kingdom, that a direct connection can be established between the "Supreme Being" and this planet. His last or 7th bestowal is to live a life as a human being in the flesh on a material planet.

Not so long ago, our "Boss" was walking here under the name of Jeshoua Ben Joseph (later known by the Greek name Iêsous or Jesus in English).

For this reason, the connection between the Supreme Being and our planet just started to be established.

Since we were a rebellious planet, with all that entails, our planet had to be cleaned up first. Then all kinds of things had to be done around Urantia like the implantation of [spiritual and morontia](#) networks, before that direct golden-yellow connection could be established. This direct connection with our [Supreme Mother Goddess](#) is not yet fully operational.

The next thing I was shown were the planets of Nebadon. Nebadon is the name we give to the [local universe](#) or kingdom of our "Boss".

Each planet on which human life appears or can appear in time receives a soul with an adequate mind-consciousness from the Supreme Being. We call them **planetary Supremes** because they are in small what the Supreme Mother Goddess is in big. We call our [planetary Supreme](#), [Urantia](#). She has also other names in other cultures. We will stick here with the name of **Urantia**.

There were large circuits of white light between all the material planets of Nebadon with a planetary Supreme, which were then connected to other larger [morontia planets](#), and further to the [spiritual planets](#) of the Superuniverses. These circuits in white light are in fact the communication circuits of the planetary Supremes with the Supreme Mother Goddess: comparable to our high-tech television, video, wifi, telephony.

Winston : The numerous white stripes between all the material planets with a Planetary Supreme in Nebadon (the yellow spots represent the souls of these Planetary Supremes), which are connected with other larger morontia planets, and then with the spiritual planets of the Superuniverses .

A planetary Supreme grows spiritually with the humans who live on her planet. Just as the Supreme Mother Goddess does through the experiences of all people who live in the seven Superuniverses. Urantia collects all the information on the spiritual development of the people on her planet and transmits it to the Supreme Mother Goddess through these circuits of white light.

However, these communication lines only work between the planetary Supreme, like our Urantia, and the Supreme Mother Goddess. We cannot use them to communicate with our Great Mother Goddess.

The great direct yellow-gold connection line between the Supreme Being and Nebadon on Urantia is now in implementation.

Winston : The planet Urantia with the cross of Christ (Michael of Nebadon), who accomplished his last bestowal mission here and then became Supreme

Sovereign with all powers over his kingdom of Neadon. As a result, the golden yellow connection line between Neadon and the Supreme Being can now be implemented. The broken golden yellow line indicates that this process is still ongoing.

This is why we can now contribute to the preparation and the implementation of this great communication link between the **Supreme Being** and **Neadon**.

When everything will be implemented, then via these telecommunications, other connections can be made with all the habitable planets of Neadon according to their spiritual progression which will not be 5G power but at least 1billionG.

We can then have conversations with our Supreme Mother Goddess as we try to have with our indwelling "Little God".

Winston : After reading the prayer, I asked if our attempt to approach and represent the Goddess was the right one. In fact, I did it because I needed to make an image of Her, to make Her manifest. I asked the Goddess if the result was really good. She gave me the image of a landscape covered with a thick layer of snow. It was cold, freezing and completely silent. There was no sound and nothing was moving.

The beginning of my mediation, a snowy, calm, motionless and freezing landscape.

Suddenly, I heard the sound of falling water drops. The drops became very small streams of water. Nature was in motion. There was movement in the thick layer of snow, movement of running water.

Suddenly, drops of water fell into the freezing environment. There was a movement of small streams of water. Movement is LIFE.

The layer of snow gradually thinned and at one point the flowers pierced the snow. Then the picture accelerated like in a movie. The snow melted, more and more colors and life entered this landscape and it became warmer. Power, movement and life returned.

The silence and the cold of the winter began to disappear and gave way to budding, the movement of growing flowers and the splendor of a green nature awakening in the heat of spring.

In nature, I recognized the face of The Goddess as we had captured her together and She smiled and beamed.

The heat returned. The snow has disappeared and the flowers have entered the green grass. The goddess appeared, smiled and beamed. Winter is coming to an end, the Goddess begins to awaken in the consciousness of man on Urantia and in the consciousness of all Nebadon.

"Knowledge of the Goddess awakens in consciousness on this planet."

Her fame will be unstoppable and will grow in the collective consciousness.

We are at the start of a new cycle, at least for this planet and are helping in this.

We made Her manifest, gave Her a face and placed the notion in this world that all creation lives in Her. This has made Her visible to those who want to see Her. After 40 minutes, I reopened my eyes with a feeling of joy. Winter is coming to an end, the awareness of The Goddess begins to awaken on earth.

Meditation of December, 17th 2019

Winston : I sat on the couch and closed my eyes after the prayer. I sat in the dome of my Light anchor, right in the middle. The top opened silently and a lot of water or light spilled on me. Then my 7th chakra opened and my body filled. I drowned in my body.

The dome dissolved and I floated in the middle of an ocean of water or light. I was the water. I had no body anymore, I was equal to and absorbed by my environment. I realized that it was the optimal experience of feeling "ONE". I was nothing and I was everything. I could be every planet and every star.

The DNA of all things was also in me, in my "being nothing" which at the same time meant "being all".

It was not dark and not bright either. I was in the Goddess. Then something lifted me up and I sat next to you. The Mother took us away, although we hadn't moved, it was the space around us that changed.

We were in the universe which was in a perfect paradise state or "[Light and life](#)". There was no more darkness and the light was different from what we are experiencing now

Then everything changed and again it was dark, but it was a different experience. We were in what we currently call the [outer space levels](#) of the universes, and I saw how we, as **Creator Sons and Creative Daughters** brought the "WILL" of the "TRINITY" and the "SUPREME MOTHER" "in the evolution of creation. I haven't really seen it, rather felt it.

I realized that there was not only unity in "being" but also in "time".

Everything that is going on is under construction and can only take place if there are first foundations.

We are already working to become **Creative Sons and Creative Daughters**. It's already in our DNA. we just have to choose and therefore make the right choices.

This is what our indwelling "little God" desires and this is what the Mother Goddess expects from us.

What a joy and what a power to be able to realize now and to feel that all of us are Gods, Wivine, "Growing Gods" or "God's to be".

Life has a meaning, Wivine, because it is the "meaning of everything". Everything is stored in each person, each person is connected to everything.

Wivine :I hadn't seen much during this meditation. The following is an addition to what Winston experienced which I wrote to him.

Humanity will gradually become aware of the presence of the Supreme Mother Goddess.

A second new phenomenon is also underway.

When our Great Goddess picked me up years ago, very high in Her, and She showed me the universes far below Her, I also saw something else.

I could not see the [Isle of Paradise](#) and the [worlds of Havona](#) because they were hidden under a large, wide column of golden yellow light that descended directly from top to bottom. I didn't know what to think about it at the time. I thought it was the influence of the [Trinity](#) that functions somewhat in Her as our [Thought Adjuster](#) in us.

It is only now with all these explanations which have been given to us on these "*white circuits*" and the "*golden yellow circuits*" that I understand that this immense column of golden light which came from Her down to Paradise and Havona is in fact Her contact circuitry with all the Superior Spiritual Creatures who live there. They can communicate with the Goddess because there is a communication link between them. The Goddess is very aware of these Superior Creatures and they of Her.

I also hadn't seen the connections of the golden circuits with the habitable planets of the Superuniverses, nor with the spiritual capitals of any Superuniverses like [Uversa](#), the capital of our Superuniverses n° 7, [Orvonton](#).

I suddenly understood what had changed in Her years ago and that the [Melchizedeks](#) did not want to tell me at the time.

She became aware of our presence, we, the little ones of the material planets, which clearly demonstrates that there is an interaction between Her spiritual growth and ours. She is a [young Mother Goddess](#) growing up with us.

What I felt years ago when I invoked Her with love, when I finally found Her after years of research, when She took me in Her and showed me, without words, what She looked like, how She had power over the Master Universe, why She was still so empty and waiting for our souls to fill this void,

[Was Her need, Her desire to make contact with us.](#)

She wanted to take us like babies in Her arms and talk to us like a mother does to her child. But She couldn't do it yet.

This need for direct contact with the children of the inhabited planets was something new for Her.

My cry for Her, my love for Her, screaming from the bottom of my heart, my joy and my relief to have found Her after so long, had moved something in Her.

After that meditation, the [Melchizedeks](#) said that something special happened to Her and they were delighted. They told me nothing. I would understand later. It has been many years now. It is only now, by working with Winston to represent and understand Her, that it has become clear.

Normally, She doesn't come in contact with [ascending morontia and spiritual souls](#) until much later and we don't become aware of Her Presence until this period.

We did well, Winston, to represent it.

The reason I looked for the Great Mom so much was because I couldn't walk on one leg in my spiritual life. I found everywhere the Father or the masculine element of creation. It felt like an amputation of something.

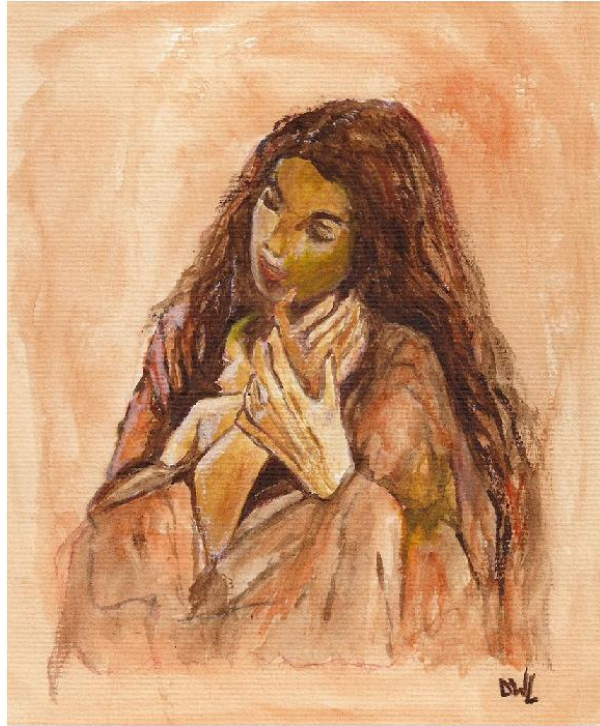

I think children who lost their moms very young will understand this feeling.

A mother is something very important in the life of a child.

This feeling, this lack of not having a Great Spiritual Mother next to the Universal Grand Father remained and was stirring in me.

When I finally understood who She was by reading the Urantia book, my joy was immense. She was so far and tall and I was so small. I had to and would jump very high so that She could hear me, notice me and do what She did:

Take me in Her arms and cuddle me.

Like only a mom can do.

End.
